- 1-71.** Rich Engel, the bookkeeper for Engel's Real Estate, and his manager are concerned about the company's telephone bills. **eXcel** Last year the company's average monthly phone bill was \$32. Rich's manager asked him for an average of this year's phone bills. Rich's records show the following: LU 1-2(1), LU 1-3(2)

January	\$ 34	July	\$ 28
February	60	August	23
March	20	September	29
April	25	October	25
May	30	November	22
June	59	December	41
	<u>\$228</u>		<u>\$168</u>

What is the average of this year's phone bills? Did Rich and his manager have a justifiable concern?

$$\$228 + \$168 = \$396 \div 12 = \$33$$

No justifiable concern.

- 1-72.** On Monday, a local True Value Hardware sold 15 paint brushes at \$3 each, six wrenches at \$5 each, seven bags of grass seed at \$3 each, four lawn mowers at \$119 each, and 28 cans of paint at \$8 each. What were True Value's total dollar sales on Monday? LU 1-2(1), LU 1-3(1)

$$\begin{aligned} & \$45 + \$30 + \$21 + \$476 + \$224 = \$796 \\ & (15 \times \$3) + (6 \times \$5) + (7 \times \$3) + (4 \times \$119) + (28 \times \$8) \end{aligned}$$

- 1-73.** While redecorating, Lee Owens went to Carpet World and bought 150 square yards of commercial carpet. The total cost of the carpet was \$6,000. How much did Lee pay per square yard? LU 1-3(2)

- 1-75.** A mall in Lexington has 18 stores. The following is a breakdown of what each store pays for rent per month. The rent is based on square footage.

5 department/computer stores	\$1,250	2 bakeries	\$ 500
5 restaurants	860	2 drugstores	820
3 bookstores	750	1 supermarket	1,450

Calculate the total rent that these stores pay annually. What would the answer be if it were rounded all the way? How much more each year do the drugstores pay in rent compared to the bakeries? LU 1-2(2), LU 1-3(1)

$$\begin{array}{r} 5 \times \$1,250 = \$ 6,250 \\ 5 \times 860 = 4,300 \\ 3 \times 750 = 2,250 \\ 2 \times 500 = 1,000 \\ 2 \times 820 = 1,640 \\ 1 \times 1,450 = 1,450 \\ \hline \$16,890 \times 12 = \$202,680 \end{array} \quad \begin{array}{r} \text{Drugstores: } \$1,640 \times 12 = \$19,680 \\ \text{Bakeries: } 1,000 \times 12 = -12,000 \\ \hline \$ 7,680 \end{array} \quad \$200,000$$

Paula believes her gross income will double in 2015 but her interest income will decrease \$150. She plans to reduce her 2015 living expenses by one-half. Paula's insurance company wrote a letter announcing that her insurance premiums would triple in 2015. Her accountant estimates her taxes will decrease \$250 and her medical costs will increase \$410. Paula also hopes to cut her investments expenses by one-fourth. Paula's accountant projects that her savings and checking accounts will each double in value. On January 2, 2015, Paula sold her automobile and began to use public transportation. Paula forecasts that her personal property will decrease by one-seventh. She has sent her bank a \$375 check to reduce her bank note. Could you give Paula an updated list of her 2015 finances? If you round all the way each 2014 and 2015 asset and liability, what will be the difference in Paula's net worth?

11. Lester Hal has the oil tank at his business filled 20 times per year. The tank has a capacity of 200 gallons. Assume (a) the price of oil fuel is \$3 per gallon and (b) the tank is completely empty each time Lester has it filled. What is Lester's average monthly oil bill? Complete the following blueprint aid for dissecting and solving the word problem. LU 1-3(1, 2)

	The facts	Solving for?	Steps to take	Key points
BLUEPRINT	Tank filled 20 times per year. Tank holds 200 gallons. Cost is \$3 per gallon.	Average monthly oil bill.	Total gallons used × Price per gallon = Total cost of oil.	Average cost is total cost divided by 12 months in a year.

Steps to solving problem

1. Calculate the total number of gallons. $200 \text{ gallons} \times 20 = 4,000 \text{ gallons}$
2. Calculate total cost of oil. $4,000 \text{ gallons} \times \$3 = \$12,000$
3. Calculate the average monthly bill. $\$12,000 \div 12 = \$1,000$
