Use the information below to answer the following question(s).

Dylan Products has a budget of \$1,200,000 in 202X for prevention costs. If it decides to automate a portion of its prevention ac it will save \$90,000 in variable prevention costs. The new method will require \$40,000 in training costs and \$150,000 in annual equipment costs. Management is willing to adjust the budget for an amount up to the cost of the new equipment. The budget production level is 210,000 units.

Appraisal costs for the year are budgeted at \$500,000. The new prevention procedures will save appraisal costs of \$50,000. Int failure costs average \$20 per failed unit of finished goods. The internal failure rate is expected to be 4% of all completed items. proposed changes will cut the internal failure rate by one-half. Internal failure units are destroyed. External failure costs average \$48 per failed unit. The company's average external failures average 2.5% of units sold. The new proposal will reduce this rate to 1%. Assume all units produced are sold and there are no ending inventories.

- 249) What is the net change in the budget of prevention costs if the procedures are automated in 202X? 249) Will management agree with the changes?
 - A) \$90,000 decrease, yes
 - B) \$90,000 increase, no
 - C) \$190,000 increase, no
 - D) \$100,000 decrease, yes
 - E) \$100,000 increase, yes

256) The CEO of Yuppie Prepared Meals is concerned about the amount of resources currently spent on customer warranty claims. Each box of snacks is printed with the guarantee: "Satisfaction guaranteed or your money back." Since the claims are so high, she would like evaluate what costs are being incurred to ensure the quality of the product. The following information was collected from various departments within the company:

| Warranty claims | \$210,000 |
|---|-----------|
| Cost of defective products found at the inspection point | 47,000 |
| Training factory personnel | 13,000 |
| Recall of Batch #59374 | 87,500 |
| Inspecting products when halfway through the production process | 27,500 |
| Cost of disposing of rejected products | 6,000 |
| Preventive maintenance on factory equipment | 3,500 |
| Production loss due to machine breakdowns | 7,500 |
| Inspection of raw materials | 2,500 |

As the new cost accountant, the CEO has requested that you complete the following Cost (Quality Report:

256)

| | Costs Incurred | Total Costs of Quality | Percentage of Total Costs of Quality |
|-------------------------|-------------------|---------------------------|--|
| Prevention Costs: | medned | | |
| | | | |
| Tatal and a state | | | |
| Total prevention costs | | | |

| Total costs of quality | | | |

257) The CEO of Yuppie Prepared Meals is concerned about the amount of resources currently spent on customer warranty claims. Each box of snacks is printed with the guarantee:
"Satisfaction guaranteed or your money back." Since the claims are so high, she would like evaluate what costs are being incurred to ensure the quality of the product. The following information was collected from various departments within the company:

| \$315,000 |
|-----------|
| 70,000 |
| 20,000 |
| 130,000 |
| 45,000 |
| 9,000 |
| 5,000 |
| 12,000 |
| 4,000 |
| |

Required:

1 - Complete a cost of quality report.

2 - The CEO has determined that if prevention costs are increased by \$55,000, external fai costs will be reduced by 20%. What would be the impact on Yuppie Prepared Meals and should they do it?

3 - The CEO has determined that if prevention costs are increased by \$55,000, both intern and external failure costs would be reduced by 10%. What would be the impact on Yuppie should they do it (consider all costs of quality)?

| Total costs of quality | | | |

258) Carl Clarkson and Lenny Lenid have been assigned to review the costs of quality at the Sprotton Chemicals Ltd. for the month of September. All amounts are in thousands (000's).

| 258) |) |
|------|---|
|------|---|

| Cost Item | Amount |
|--|----------|
| Product testing | \$350 |
| Clean up of toxic spills within the plant | \$14,200 |
| Employee training | \$200 |
| Quality Engineering | \$675 |
| Supplies used in testing | \$500 |
| Statistical Process Control | \$1,750 |
| Payments on lawsuits from product failures | \$25,000 |

Some information from a competitor, Sheltonville Industries, has been leaked. You learn the Sheltonville's costs of quality (as a percentage of total costs of quality) is 15% on external fractional failure, 35% on appraisal and the rest on prevention.

Required:

a. Prepare a cost of quality report for September for the Sprotton Chemicals including calculations of each cost category as a percentage of total costs of quality.

b. Compare Sprotton's approach to quality management to Sheltonville's. Comment on y findings. (What are the implications of the differences?)

ESSAY. Write your answer in the space provided or on a separate sheet of paper.

259) Cari and Jereme just bought a bed and breakfast inn at a very attractive price. The business had been doing poc Before they reopened the inn for business, they attended a seminar on operating a high quality business. Now t they are ready to open the inn, they need some advice on quality costs and management.

Required:

Identify four categories of quality costs. In addition, identify three items that would be classified in each of the categories.

| Item | Managerial Accounting | Financial Accounting | |
|---------------------------------|--------------------------------|--------------------------------|--|
| | | External Users (shareholders, | |
| Primary Users | Internal Users | creditors and regulators) | |
| | To help managers plan, direct, | To help external users make | |
| Purpose of Information | control and make decisions | investing and lending decisior | |
| | Any internal report deemed | | |
| Primary Product | worthwhile by management | Financial Statements | |
| What must be included/how it | | Standards must be chosen, IFF | |
| should be formatted | Determined by management | or ASPE | |
| Underlying basis | Focus on the future | Historical transactions | |
| What information characteristic | | | |
| is emphasized | Relevance | Reliable and objective | |
| Business unit | Segments of the business | The company as a whole | |
| Frequency of reports | Determined by management | Annually and quarterly | |
| | No independent audits | Publicly traded companies mu | |
| Verification | required | be audited by independent CP | |
| Required by outside agency | No | Yes - securities commissions | |
| Concerns over the impact on | Management should consider | Primary concern is adequacy o | |
| employees' behaviour | behavioural implications | disclosure | |

- 72) Managerial accounting is likely to be much more useful to a plant manager than financial accounting. Financial account typically gives financial information for the company as a whole; the plant manager would find very little information financial accounting reports which relate directly to the plant environment and the performance of the plant itself. Mai accounting, on the other hand, could provide the plant manager with information relating to just the plant. Examples (types of information provided by managerial accounting are:
 - a. comparison of budgeted costs versus actual costs.
 - b. tracking of safety incidents.
 - c. quality costs.
 - d. product line profitability.
 - e. profitability by shift.

(Student examples may vary.)

73) Management accounting provides information to internal decision makers of the business such as top executives, managers, sales representatives, and production supervisors. Its purpose is to help managers predict and evaluate future results. Reports are generated often and usually broken down into smaller reporting divisions such as department or product line. There are no rules to be complied with since these reports are for internal use only. Management accounting embraces more extensively such topics as the development and implementation of strategies and policies, budgeting, special studies and forecasts, influence on employee behaviour, and nonfinancial as well as financial information.

Financial accounting, by contrast, provides information to external decision makers such as investors and creditors. Its purpose is to present a fair picture of the financial condition of the company. Reports are generated quarterly or annuar report on the company as a whole. The financial statements must comply with IFRS/ASPE. A CPA audits, or verifies, t IFRS/ASPE are being followed.

254) Requirement A:

| | Costs Incurred | Total Costs of Quality | Percentage of Total Costs of Quality |
|------------------------------|-------------------|---------------------------|--|
| Prevention Costs: | | | |
| Personnel training | \$20,000 | | |
| Total prevention costs | | \$20,000 | 3% |
| Appraisal Costs: | | | |
| Inspecting raw materials | \$10,000 | | |
| Inspecting 10% of final | \$10,000 | | |
| products | | | |
| Total appraisal costs | | \$20,000 | 3% |
| Internal Failure Costs: | | | |
| Rework | \$20,000 | | |
| Production loss due to | \$90,000 | | |
| machine breakdown | | | |
| Total internal failure costs | | \$110,000 |) 15% |
| External Failure Costs: | | | |
| Litigation costs from produc | t \$350,000 | | |
| liability claims | | | |
| Warranty return costs | \$240,000 | | |
| Total external failure costs | | \$590,000 |) 79% |
| Total costs of quality | | \$740,000 | 100% |

Requirement B:

Because the company has warranty returns and litigation costs it is possible that it has a reputation for poor quality. T be resulting in lost sales and hence lost profits.

Requirement C:

The Cost of Quality report shows that little is being spent on prevention and maintenance.

255) Requirement A:

| | Costs Incurred | Total Costs of Quality | Percentage of Total Costs of Quality |
|--|-------------------|---------------------------|--|
| Prevention Costs: | | 0. 200 | 0. 200 |
| Personnel training | \$12,000 | | |
| Total prevention costs | | \$12,000 | 3% |
| Appraisal Costs: | | | |
| Inspecting raw materials | \$6,000 | | |
| Inspecting 10% of final | \$6,000 | | |
| products | | | |
| Total appraisal costs | | \$12,000 | 3% |
| Internal Failure Costs: | | | |
| Rework | \$12,000 | | |
| Production loss due to machine breakdown | \$54,000 | | |
| Total internal failure costs | | \$66,000 | 15% |
| External Failure Costs: | | | |
| Litigation costs from produc liability claims | t \$210,000 | | |
| Warranty return costs | \$144,000 |) | |
| Total external failure costs | | \$354,000 |) 79% |
| Total costs of quality | | \$444,000 |) 100% |

Requirement B:

Because the company has warranty returns and litigation costs it is possible that it has a reputation for poor quality. T be resulting in lost sales and hence lost profits.

Requirement C:

The Cost of Quality report shows that little is being spent on prevention and maintenance.

256)

| | Costs Incurred | Total Costs of Quality | Percentage of Total Costs of Quality |
|--|-------------------|---------------------------|--|
| Prevention Costs: | | | |
| Personnel training | \$13,000 | | |
| Preventative maintenance on factory | \$3,500 | | |
| equipment | | | |
| Total prevention costs | | \$16,500 | 4% |
| Appraisal Costs: | | | |
| Mid-point inspection | \$27,500 | | |
| Inspection of raw materials | \$2,500 | | |
| Total appraisal costs | | \$30,000 | 7% |
| Internal Failure Costs: | | | |
| Cost of defective products found at the inspection point | \$47,000 | | |
| Cost of disposing of defective product | \$6,000 | | |
| Production loss due to machine breakdowns | \$7,500 | | |
| Total Internal Failure Costs | | \$60,500 | 15% |
| External Failure Costs: | | | |
| Warranty claims | \$210,000 | | |
| Cost of recall | \$87,500 | | |
| Total external failure costs | | \$297,500 | 74% |
| Total costs of quality | | \$404,500 | 100% |
| | | | |

| | | — | Percentage o |
|----------------------------------|-----------|-------------|--------------|
| | Costs | Total Costs | Total Costs |
| | Incurred | of Quality | of Quality |
| Prevention Costs: | | | |
| Personnel training | \$20,000 | | |
| Preventative maintenance on | \$5,000 | | |
| factory equipment | | | |
| Total prevention costs | | \$25,000 | 4% |
| Appraisal Costs: | | | |
| Mid-point inspection | \$45,000 | | |
| Inspection of raw materials | \$4,000 | | |
| Total appraisal costs | | \$49,000 | 8% |
| Internal Failure Costs: | | | |
| Cost of defective products found | \$70,000 | | |
| at the inspection point | | | |
| Cost of disposing of defective | \$9,000 | | |
| products | | | |
| Production loss due to machine | \$12,000 | | |
| breakdowns | | | |
| Total Internal Failure Costs | | \$91,000 | 15% |
| External Failure Costs: | | | |
| Warranty claims | \$315,000 | | |
| Cost of recall | \$130,000 | | |
| Total external failure costs | | \$445,000 | 73% |
| Total costs of quality | | \$610,000 | 100% |

2 - Increase Prevention Cost\$55,000External Failure cost savings\$445,000 × 20%Net Savings\$44,000

They should implement the change

| 3 - | Increase Prevention Cost | \$55,000 |
|-----|---|-----------------|
| | Internal and External Failure cost savings (\$91,000 + 445,000) × 20% | (53,600) |
| | Net Cost | <u>\$ 1,400</u> |

Based on the identifiable costs of quality they may argue that they should not implement the change, however, lost sal to poor quality is an unknown amount. Yuppie may gain sales with an improvement in quality.

258) a.

| | Sprotton Sept | % of Cost | Sheltonville |
|----------------------------------|----------------|-----------|--------------|
| Prevention: | | | |
| Quality Engineering | \$675 | | |
| Employee Training | \$200 | | |
| Statistical Process Control | <u>\$1,750</u> | | |
| Total Prevention Costs | \$2,625 | 6.15% | 30.00% |
| Appraisal: | | | |
| Product Testing | \$350 | | |
| Supplies used in Testing | <u>\$500</u> | | |
| Total Appraisal Costs | \$850 | 1.99% | 35.00% |
| Internal Failure: | | | |
| Cleanup of toxic spills in plant | \$14,200 | | |
| Total Internal Failure | \$14,200 | 33.27% | 20.00% |
| External Failure: | | | |
| Lawsuits | \$25,000 | | |
| Total External Failure | \$25,000 | 58.58% | 15.00% |
| Total Costs of Quality | \$42,675 | | |

b.

There is a distinct difference as to the distribution of the costs of quality between the two organizations. Sheltonville ir more in upstream costs (65% in prevention and appraisal costs) compared to Sprotton (8.14%). Failures downstream a generally more costly in terms of both actual costs (product costs are incurred when units fail and external failure cost to be high) and the opportunity costs from lost sales.

259) Prevention:

Hiring employees with good references. Training of owners and employees. Good security. Good reservation system. Purchasing quality furniture.

Appraisal:

Verifying accuracy of reservation and registration procedures. Inspecting rooms, facilities, building and grounds regularly. Observing activities of employees. Testing furniture and fixtures. Taste testing food.

Internal failure: Recleaning rooms and facilities. Restocking rooms with linens, glasses, etc. Out of stock supplies. Reinspection. Failure to bill on a timely basis.

External failure: Responding to complaints about rooms and food. Responding to complaints about reservations. Emergency cleaning of rooms when not ready on time. Customer refunds because of unsatisfactory conditions. Opportunity cost of lost revenue resulting from unhappy customers.
