SHORT ANSWER. Write the word or phrase that best completes each statement or answers the question.

1) Simplify: (28 - 4)/3

1) _____

Answer: (28 - 4)/3 = 24/3 = 8

Explanation: ID: cbm12h 1-1

Topic: 1.1 Basics of Arithmetic

2) Simplify: 8 + 6 * 2

2)

Answer: 8 + 12 = 20 Explanation:

ID: cbm12h 1-2

Topic: 1.1 Basics of Arithmetic

3) Simplify: 5(4 + 3)

3)

Answer: 5 * 7 = 35Explanation:

ID: cbm12h 1-3

Topic: 1.1 Basics of Arithmetic

4)

4) Simplify: $\frac{20 - 15}{15 + 5}$

Answer: 5/20 = .25 Explanation: ID: cbm12h 1-4

Topic: 1.1 Basics of Arithmetic

5) Simplify: $\frac{50 - 10}{12 + 8}$

5)

Answer: 40/20 = 2 Explanation: ID: cbm12h 1-5

Topic: 1.1 Basics of Arithmetic

6)

6) Simplify: 9(8 - 5) + 5(6 + 4)

Answer: 9 * 3 + 5 * 10 = 27 + 50 = 77

Explanation: ID: cbm12h 1-6

Topic: 1.1 Basics of Arithmetic

7) Evaluate: $\frac{268}{4400 * 156/366}$

7) _____

Answer: 268/(4400 * .4262295) = 268/1875.4098 = .1429021

Explanation: ID: cbm12h 1-7

Topic: 1.1 Basics of Arithmetic

8) Evaluate and round to 3 decimal places: 125(6 + 0.35 * 142/678)

8)

Answer: 125 * (6 + 0.35 * 0.2094395) = 125 * (6 + 0.0733038) = 125 * (6.0733038) = 759.163

Explanation: ID: cbm12h 1-8

Topic: 1.1 Basics of Arithmetic

9) Evaluate: 400(1 + .10 * 100/365)

9)

Answer: 400 * (1 + .10 * .2739726) = 400 * (1 + .02739726) = 400 * (1.02739726) = 410.959

Explanation: ID: cbm12h 1-9

Topic: 1.1 Basics of Arithmetic

10) Evaluate and round to one decimal place: 9210(5 - 1.38 * 169/420)

10)

Answer: 9210 * (5 - 1.38 * 0.40238095) = 9210 * (5 - 0.5552857) = 9210(4.444714) = 40,935.8

Explanation: ID: cbm12h 1-10

Topic: 1.1 Basics of Arithmetic

11) Evaluate: $\frac{2424}{1 + .2 * 166/365}$

11)

Answer: 2424/(1 + .2 * .4547945) = 2424/(1 + .0909589) = 2424/1.0909589 = 2221.899

Explanation:
ID: cbm12h 1-11
Topic: 1.2 Fractions

12) Evaluate and round to three decimal places: $\frac{3140}{2 + 0.035 \times \frac{155}{730}}$

 $\frac{3140}{+0.035 \times \frac{155}{----}}$

Answer: 3140/(2 + 0.35 * 0.2123288) = 3140/(2 + 0.0743151) = 2910/2.074315068 = 1513.753

Explanation: ID: cbm12h 1-12 Topic: 1.2 Fractions 13) Evaluate: $\frac{5000}{1 + .1 * 183/366}$

Answer: 5000/(1 + .1 * .5) = 5000/(1 + 0.05) = 5000/1.05 = 4761.90

Explanation: ID: cbm12h 1-13 Topic: 1.2 Fractions

14) Spade Realty sold lots for \$23 240 per hectare. What is the total sales value if the lot sizes, i 14) hectares,

were $2\frac{1}{2}$, $3\frac{1}{4}$, $4\frac{1}{5}$?

Answer: $23240 * (\frac{1}{2} + 3\frac{1}{4} + 4\frac{1}{5})$ = $23240 * (2\ 10/20 + 3\ 5/20 + 4\ 4/20)$ = $23240 * (9\ 19/20) = 23240 * 9.95$ = \$231238

Explanation: ID: cbm12h 1-14 Topic: 1.2 Fractions

15) Three mechanics worked $15\frac{1}{2}$, $14\frac{3}{4}$, $18\frac{1}{8}$ hours respectively. What was the total cost of 15)

labour if the mechanics were paid \$14.75 per hour?

Answer: Total Hours

$$= 15\frac{1}{2} + 14\frac{3}{4} + 18\frac{1}{8}$$

$$= 15.5 + 14.75 + 18.125$$

$$= 48.375$$
Total cost of labor = $48.375 * 14.75 = 713.53

Explanation:
ID: cbm12h 1-15
Topic: 1.2 Fractions

16) Ana, Aamir and Charlotte worked $11\frac{3}{4}$, $14\frac{13}{20}$, and $22\frac{4}{5}$ hours respectively. What was the 16)

total cost of labour if they were paid \$18.00 per hour?

Answer: Total Hours

$$= 11\frac{3}{4} + 14\frac{13}{20} + 22\frac{4}{5}$$
$$= 11.75 + 14.65 + 22.80$$
$$= 49.20$$

Total cost of labor = 49.20 * 18.00 = \$885.60

Explanation: ID: cbm12h 1-16 Topic: 1.2 Fractions 17) A retailer returned 300 defective items to the manufacturer and received a credit for the retail price of \$0.75 less a discount of 1/3 of the retail price. What was the amount of the credit received by the retailer?

17)

Answer: Retail value = 300(\$0.75) = \$225

Credit = (1-1/3)*\$225 = (2/3)*\$225 = \$150

Explanation: ID: cbm12h 1-17

Topic: 1.4 Applications - Averages

18) Complete the following inventory sheet and find the total value.

18)

Item	Quantity	Cost per Unit Total
1	69	\$.85
2	111	16 2/3 cents
3	155	\$2.75
4	350	\$1.66

Answer:
$$1161616161669 \times 0.85$$
 = \$58.65
 $111 \times 0.16 \ 2/3 = 330 \times 0.1666667$ = 18.50
 155×2.75 = 426.25
 350×1.66 = $\frac{581.00}{1084.40}$

Explanation: ID: cbm12h 1-18

Topic: 1.4 Applications - Averages

19) Extend each of the following and determine the total.

19)

Quantity	Unit Price
48	\$2.45
48	$$0.83\frac{1}{8}$
16	\$2.12
60	$$1.33\frac{1}{6}$

Answer: Quantity	Unit Price	Value
48	\$2.45	\$117.60
48	0.83 1/8	39.90
16	2.12	33.92
60	1.33 1/6	79.90
Total:		\$271.32

Explanation: ID: cbm12h 1-19

20) Purchases of packs of printing paper during the last accounting period were as follows:

20)

Number of items	Unit price
8	\$13.00
4	\$12.00
15	\$10.00
10	\$10.50

What was the weighted average price per item?

Answer:	Number	of items	S	Unit price		Weighted value
		8	×	\$13.00	=	104.00
		4	×	\$12.00	=	48.00
		15	×	\$10.00	=	150.00
		<u>10</u>	×	\$10.50	=	105.00
	Total:	37				407.00

Average price was 407/37 = \$11.00

Explanation:

ID: cbm12h 1-20

Topic: 1.4 Applications - Averages

 $21) \ \mbox{Purchases}$ of an inventory item during last month were as follows:

21)			

Number of items	Unit price
5	\$5.00
10	\$8.00
8	\$6.00
15	\$3.00

What was the weighted average price per item?

Answer:	Numbe	r of items		Unit price		Weighted value
		5	×	\$5.00	=	25.00
		10	×	8.00	=	80.00
		8	×	6.00	=	48.00
		<u>15</u>	×	3.00	=	<u>45.00</u>
	Total:	38				198.00

Average price was 198/38 = \$5.21

Explanation:

ID: cbm12h 1-21

22) Noriko's final mark for her Financial Mathematics course was based on four tests with different weightings. Test one counted for 10% of the final grade, test two for 20%, test three for 30% and test four for 40%. If Clara received 70% on test one, 85% on test two, 64% on test three and 72% on test four, calculate her final mark.

22) _____

Answer: = 70(0.1) + 85(0.2) + 64(0.3) + 72(0.4) = 7 + 17 + 19.2 + 28.8 = 72

= 72 Explanation: ID: cbm12h 1-22

Topic: 1.4 Applications - Averages

- 23) On a trip, a motorist purchased gasoline as follows: 66 litres at 69.0 cents per litre; 69 litres 23) cents per litres; 80 litres at 71.5 cents per litre; and 57 litres at 74.5 cents per litre.
 - a) What was the average number of litres per purchase?
 - b) What was the average cost per litre?
 - c) If the motorist averaged 9.75 km per litre, what was her average cost of gasoline per kilometre?
 - Answer: a) 66 + 69 + 80 + 57 = 272

Average number of litres = $272 \div 4 = 68$

b) Average cost per litre:

Total cost = $66 \times 69.0 = 45.54$ $69 \times 70.5 = 48.645$ $80 \times 71.5 = 57.20$ $57 \times 74.5 = \frac{42.465}{193.85}$ cents

Average cost = $193.86 \div 272 = 71.27$ cents

c) Average cost per km = $71.27 \div 9.75 = 7.3097436$ cents

Topic: 1.4 Applications - Averages

24) Dorian Frump invested \$12 500 in a business on January 1. She withdrew \$850 on April 3, reinvested \$1920 on August 1, and withdrew \$700 on September 1. What is Don's average monthly investment balance for the year?

24)

Answer: Weighted investment:

January 1 — March 31: $12500 \times 3/12 = 3125.0000$ April 1 - July 31: $11650 \times 4/12 = 3883.3333$ August 1 - August 31: $13570 \times 1/12 = 1130.8333$ September 1 - December 31: $12870 \times 4/12 = 4290.0000$ Average investment balance =\$12429.17

Explanation: ID: cbm12h 1-24

25) Tommy Hughes invested \$10 000 in a business on January 1. He withdrew \$1000 on March 1, reinvested \$5000 on July 1, and withdrew \$4000 on October 1. What is Tommy's average monthly investment balance for the year?

25)

Answer: Weighted investment:

January 1 - February 28: $10000 \times 2/12 = 1666.6700$ March 1 - June 30: $9000 \times 4/12 = 3000.0000$ August 1 - August 31: $14000 \times 3/12 = 3500.0000$ September 1 - December 31: $10000 \times 3/12 = 2500.0000$ Average investment balance =\$10666.67

Explanation: ID: cbm12h 1-25

Topic: 1.4 Applications - Averages

26) The following information is shown in your investment account for last year. The balance on January 1 was \$7600.00. A withdrawal of \$420.00 was made on March 1. A deposit of \$1690.00 was made on May 1 and another deposit of \$130.00 was made on October 1. What was the average monthly balance for the year in your account?

26)

Answer: Date Balance Months Weighted value

January	1	7600	2	15 200
March	1	7180	2	14 360
May	1	8870	5	44 350
October	1	8740	<u>3</u>	26 220
		Total:	 12	100 130

Average monthly balance = 100130/12 = \$8344.17

Explanation: ID: cbm12h 1-26

hours.

Topic: 1.4 Applications - Averages

27) Kevin Ash earns a semi-monthly salary of \$1023.40 and works a regular workweek of 40 27)

- a) What is Kevin's hourly rate of pay?
- b) If Kevin's gross earnings in one pay period were \$1390.47, for how many hours of overl was he paid at time and one-half of his regular pay?

Answer: a) Semimonthly pay = \$1023.40

Yearly salary = \$24 561.60

Weekly gross pay = $24561.60 \div 52 = 472.34

Hourly rate = $472.34 \div 40 = 11.81

b) Gross pay = 1390.47

Regular pay = $\frac{-1023.40}{367.07}$ Overtime pay = $\frac{367.07}{367.07}$

Number of overtime hours = $(367.07 \div 1.5) \div 11.81 = 20.72$ hrs.

Explanation: ID: cbm12h 1-27

28) R.J. earns \$11.70 an hour, with time-and-a-half for hours worked over 36 a week. His clock hours for a week are 10.5, 7.5, 11, 13, and 9.75. Determine his gross earnings for a week.

28)

Answer: Total hours = 10.5 + 7.5 + 11 + 13 + 9.75 = 51.75Regular weekly earnings = $36 \times $11.70 = 421.20 Overtime earnings = $(51.75 - 36) \times $11.70 \times 1.5 = 276.41 Gross = Regular time + Overtime = \$421.20 + \$276.41 = \$697.61

Explanation: ID: cbm12h 1-28

Topic: 1.5 Applications - Payroll

29) Florence Lamb is paid a commission of 10 3/4% on her net sales and is authorized to draw up to \$900.00 a month. What is the amount due to Florence at the end of a month in which she drew \$820.00, had sales of \$14 660.00, and sales returns of \$331.20?

29)

Answer: Gross sales = \$14660.00 Less: returns = $\frac{331.20}{14328.80}$

Gross commission = $14328.80 \times .1075 = 1540.35$ Less: drawings $\underbrace{820.00}_{720.35}$

Explanation: ID: cbm12h 1-29

Topic: 1.5 Applications - Payroll

30) A sales representative selling computer parts receives a commission of 3.5% on net sales up to \$15,000.00, 7% on the next \$6000.00, and 9% on any further sales. If his sales for a month were \$34,250.00 and sales returns were \$1055.00, what was his commission for the month?

30)

Answer: Gross sales = \$34250.00 Less: returns = 1055.00 Net sales = \$33195.00

> Commission: $= .035 \times 15000.00 = 525.00 $= .07 \times 6000.00 = 420.00$ $= .09 \times 12195.00 = 1097.55$

Total commission = \$2042.55

Explanation: ID: cbm12h 1-30

Topic: 1.5 Applications - Payroll

31) A salesperson had gross earnings of \$943.25 for last week on gross sales of \$8320.00. If returns and allowances were 5.5% of gross sales, what is his rate of commission based on net sales?

31)

Answer: Net sales = (1 - .055) * 8320 = 7862.40Commission rate = $\frac{943.25}{7862.40} = 11.997\%$

Explanation: ID: cbm12h 1-31

32) A salesperson is paid a weekly salary of \$350.00 or a commission of 14.5% of his sales, which 32)

is the greater. What is his earnings for a week in which his sales were

- a) \$2480.00?
- b) \$3780.00?

Answer: a) Salary = \$350.00

Commission = .145 * 2480.00 = \$359.60 Gross earnings = \$709.60

b) Salary = \$350.00

Commission = .145 * 3780.00 = \$548.10 Gross earnings = \$898.10

Explanation:

ID: cbm12h 1-32

Topic: 1.5 Applications - Payroll

- 33) Beth's annual salary is \$42 120.00. Her regular work-week is 36 hours and she is paid semi-monthly.
- 33)

34)

- a) Calculate her gross pay period
- b) Calculate her hourly rate of pay
- c) Calculate her gross pay for a period in which she works 12 hours of overtime at time a one-half regular pay.

Answer: a) $\frac{42120}{2 \times 12} = 1755.00

b)
$$\frac{42120}{52 \times 36} = $22.50$$

c) Overtime = $12 \times 22.50 \times 1.5 = \405.00 Gross pay = 1755.00 + 405.00 = \$2160.00

Explanation:

ID: cbm12h 1-33

Topic: 1.5 Applications - Payroll

34) Scott Rae had gross earnings of \$554.30 for last week. Scott earns a base salary of \$350.00 on a weekly quota of \$4 500.00. If his sales for the week were \$6124.00, what is his commission rate?

Answer: Gross earnings = \$554.30

 Less: base salary
 =
 350.00

 Commission:
 =
 \$204.30

 Sales for week
 =
 \$6124.00

 Quota
 =
 4500.00

Commission sales = $\frac{300.00}{1624.00}$ Rate of commission = $\frac{204.30}{1624.00}$ = 12.58%

Explanation:

ID: cbm12h 1-34

35) A.J. is paid an annual salary of \$41 840.00. She is paid monthly on a 40-hour work week.

What is the gross pay for a pay period in which she works 9 hours overtime at time-and-a-half regular pay?

Answer: Weekly pay = $\frac{41840.00}{52}$ = 804.6154

Hourly pay =
$$\frac{804.62}{40}$$
 = \$20.1154

Regular monthly earnings =
$$\frac{41840}{12}$$
 = 3486.67

Overtime earnings = $20.1154 \times 9 * 1.5 = 271.56$

Gross = Regular time + Overtime = 3486.66 + 271.56 = \$3758.22

Explanation:

ID: cbm12h 1-35

Topic: 1.5 Applications - Payroll

36) Corrine Davis had gross earnings of \$937.50 for the week. If she receives a base salary of \$664.00 on a quota of \$7800.00 and a commission of 6.75% on sales exceeding the quota, what were Corrine's sales for the week?

36)

Answer: Gross earnings = 937.50

Less: base salary = $\underline{664.00}$

Commission:273.50

Commission sales =
$$\frac{273.50}{.0675}$$
 = 4051.85

Sales for week = (7800 + 4051.85) = 11851.85

Explanation:

ID: cbm12h 1-36

Topic: 1.5 Applications - Payroll

37) Abigail receives a commission of 4.5% on the first \$1250.00 of sales during a week. On the next \$4500.00 she receives a commission of 11.5%. On any additional sales, the commission rate is 13.75%. Find her gross earnings for a week during which her sales amount to \$14,200.00.

Answer: Commission on first \$1250.00 is $0.045 \times 1250.00 = 56.25$

Commission on next \$4500.00 is $0.115 \times 4500.00 = 517.50$

Commission on remainder = $0.1375 \times 8450 = 1161.875$

After rounding to the nearest cent, gross earnings are \$1293.63.

Explanation:

ID: cbm12h 1-37

38) Last week Dana worked 46 hours. For the regular workweek of 40 hours she is paid \$12.40 per hour, and for every hour over 40 hours she is paid at time and one-half regular pay. How much did she earn last week?

38) _____

Answer: For the first 40 hours = 40(12.40) = 496.00For the next 6 hours = 6(12.40 + 6.20) = 111.60The total = 496.00 + 111.60 = \$607.60

Explanation: ID: cbm12h 1-38

Topic: 1.5 Applications - Payroll

39) Kim Farrena earns \$17.60 per hour. Overtime from Monday to Friday is paid at time and one-half regular pay for any hours over 7 1/2 per day. Overtime on weekends is paid at double the regular rate of pay. Last week Kim worked regular hours on Monday, Wednesday, and Friday, 8.5 hours on Tuesday, 11.75 hours on Thursday, and 5 hours on Saturday. Determine Kim's gross wages by each of the two methods.

39)

Answer: Method A Regular hours = 37.5×17.60 = 660.00Overtime pay = $5.25 \times 17.60 \times 1.50$ = 138.60 $5 \times 17.60 \times 2$ = 176.00Gross earnings = \$974.60

> Method B At regular rate: 47.75×17.60 = 840.40 Overtime premium: $5.25 \times 17.60 \times 0.50$ = 46.20 Overtime premium $5 \times 17.60 \times 1$ = 88.00 Gross earnings = \$974.60

Explanation: ID: cbm12h 1-39

Topic: 1.5 Applications - Payroll

40) C.O. is paid a semi-monthly salary of \$1 250.00. If his regular work week is 35 hours, what is his hourly rate of pay?

40)

Answer: Annual salary = $1250.00 \times 24 = 30000.00$

Weekly pay =
$$\frac{30000}{52}$$
 = 576.92

Hourly rate =
$$\frac{576.92}{35}$$
 = \$16.48

Explanation:

ID: cbm12h 1-40

41) C.O. is paid a semi-monthly salary of 2 754.30. If his regular work week is 42 hours, what 41) is his hourly rate of pay?

Answer: Annual salary = $2754.30 \times 24 = 66103.20$

Weekly pay =
$$\frac{66103.20}{52}$$
 = 1271.22

Hourly rate =
$$\frac{1271.22}{42}$$
 = \$30.27

Explanation:

ID: cbm12h 1-41

Topic: 1.5 Applications - Payroll

42) An employee receives a gross pay of \$750.73 for 47.25 hours of work. What is the hourly rate of pay if a regular work week is 37.5 hours and overtime is paid at time-and-a-half the regular rate of pay?

Answer: Let the regular rate of pay be y.

Regular weekly pay = 37.5y

Overtime pay = $(9.75 \times 1.5)y = 14.625y$

Total pay = 37.5y + 14.625y = 750.7

$$52.125y = 750.73$$

$$y = 14.40$$

The regular rate of pay is \$14.40

Explanation:

ID: cbm12h 1-42

Topic: 1.5 Applications - Payroll

43) Ali checked his pay stub on his employee portal and it showed gross earnings of \$596.00 for 51 hours of work. What is his hourly rate of pay if the regular workweek is 40 hours and overtime is paid at time and one-half the regular rate of pay?

Answer: Total hours = 51

Regular hours = 40 Overtime hours = 11

At time-and-a-half, overtime hours are equivalent to

 $11 \times 1.5 = 16.5$ regular hours

Rate of pay = 596/56.5 = \$10.55

44) Barb's Home Income Tax business operates only during tax season. Last season Barb grossed \$38 790 including GST. During that season she spent \$9500 before GST on her paper and supply purchases. How much does Barb owe Revenue Canada for GST?

44)

Answer: Barb's revenue of \$38 790 includes 5% GST.

GST taxable revenue =
$$\frac{38790}{1.05}$$
 = 36 942.86

GST collected = 5% of 36 942.86 = 1 847.14

GST paid = 5% of 9 500 = 475.00

Barb owes Revenue Canada \$1847.14 - \$475 = \$1372.14

50) The town of Pandora assesses property at market value. How much will the owner of a house valued at \$325 000 owe in taxes if this year's mill rate has been set at 21.386?

50)

Answer: Property tax = $32500 \left[\frac{21.368}{1000} \right] = 6950.45

Explanation: ID: cbm12h 1-50

Topic: 1.6 Applications - Taxes

51) A town has an assessed residential property value of \$350 000 000. The town council must 51) the following expenditures:

Education: \$11 050 000
General Purposes: \$2 100 000
Recreation: \$270 000
Public works: \$670 000
Police and fire protection: \$857 500

- a) Suppose 70% of the expenditures are charged against residential real estate. Calculate total property taxes that must be raised.
- b) What is the mill rate?
- c) What is the property tax on a property assessed at \$235 000?

Answer: a) Total expenditure = \$(11050000 + 2100000 + 270000 + 670000 + 958500) = 14947500

Total residential property tax = 0.70(14947500) = \$10463250

- b) Residential mill rate = $\frac{10463250}{35000000}$ (1000) = 29.895
- c) Property tax = $$235000 \left| \frac{29895}{1000} \right| = 7025.33

- 57) Last week April worked 44 hours. She is paid \$11.20 per hour for a regular workweek of 40 hours and overtime at time and one-half regular pay.
 - a) What were April's gross wages for last week?
 - b) What is the amount of the overtime premium?

Answer: a) Regular earnings = 40×11.20 = 448.00 Overtime pay = $4 \times 11.20 \times 1.5$ = 67.20Gross earnings = \$515.20

b) Overtime premium = $4 \times 11.20 \times 0.5 = 22.40

Explanation:

ID: cbm12h 1-57

58) Nick's gross earnings for one week was \$698.10. His regular rate of pay is \$15.60 for a 35 hour week and overtime is paid at time and one-half regular pay. Calculate the number of hours that Nick worked.

58) _____

Answer: Gross earnings = 698.10

Regular earnings = $35 \times 15.60 = 546.00$

Overtime pay = 698.10 - 546.00 = 152.10Overtime hours = $\frac{152.10}{15.60 \times 15} = 6.5$ hours

Total number of hours worked = 35 + 6.5 = 41.5 hours

Explanation:

ID: cbm12h 1-58

Topic: 1.5 Applications - Payroll

- 59) Mohammad is paid a weekly commission of 2% on net sales of \$6000.00, 4% on the next \$3 59) 000.00 and 6.25% on all further sales. His gross sales for a week were 11 160.00 and sales read allowances were \$120.00.
 - a) Calculate his gross earnings for the week.
 - b) Calculate the average hourly rate of pay for the week if he worked 40 hours.

Answer: a) Net sales = Gross sales - Returns = 11 160 - 120 = 11 040

Commission: 2% of 6000 = 120.00 4% of 3000 = 120.00

6.25% of (11 040 - 9000) = 127.50

Gross earnings = 120.00 + 120.00 + 127.50 = \$367.50

b) Average hourly rate = $367.50 \div 40 = 9.19

Explanation:

- 60) September is paid on a weekly commission basis. She is paid a base salary of \$370.00 on a weekly quota of \$9500.00 and a commission of 5.75% on any sales in excess of the quota.
 - a) If September's sales for last week were \$11 340.00, what were her gross earnings?
 - b) What are September's average hourly earnings if she worked 35 hours?

Answer: a) Base salary on quota of \$9500 = 370.00 Commission = 5.75% on 1840 = 105.80

Gross earnings = \$475.80

b) Hourly rate = $475.80 \div 35 = 13.59

Explanation:

ID: cbm12h 1-60

61) Bill earned a gross commission of \$2551.05 during August. What were his gross sales if his rate of commission is 14.5% of net sales and sales returns and allowances for the month were 6% of his sales?

61)

Answer: Net sales = $2551.05 \div 0.145 = 17593.448$

Net sales = Gross sales - returns

17593.448 = Gross sales - 6% of Gross sales

17593.448 = 94% of Gross sales

Gross sales = $\frac{17593.48}{.94}$ = \$18 716.43

Explanation:

- 62) Yanping receives a monthly salary of \$1931.54 paid semi-monthly. The regular workweek 62) ______ is 38 hours.
 - a) Calculate the hourly rate of pay.
 - b) If the gross earnings for one pay period is 1270.75, for how many hours of overtime w Yanping paid at double-time regular pay.

Answer: a) Annual gross earnings = $1931.54 \times 12 = 23178.48$

Weekly gross earnings = $\frac{23178.48}{52} = 445.74$

Hourly rate of pay = $\frac{445.74}{38}$ = \$11.73

b) Regular semi-monthly gross earnings = $\frac{1931.54}{2}$ = 965.77

Overtime pay = 1270.75 - 965.77 = 304.98

Overtime rate = $11.73 \times 2 = 23.46$

Overtime hours = $\frac{304.98}{23.46}$ = 13 hours

Answer:

- a) Total Residential property tax = 0.8(300 000 000) = \$240 000 000
- b) MiII rate = $\frac{240000000}{1100000000}$ (1000) = 218.18
- c) Property tax = $500000 \left[\frac{218.18}{1000} \right] = $109 090$

SHORT ANSWER. Write the word or phrase that best completes each statement or answers the question.

93) Phil works for a hydro company in a 35 hour work week schedule. His contract pays him \$1345/week for working Monday to Friday, 7 hours a day. If he spends more time than his usual time, he is entitled to "time and a half" on time worked in excess of 7 hours per day. If he works on Sundays or statutory holidays, he is entitled to twice the time. Calculate his gross earnings for the month of October 2013, if he worked for 5 hours on Thanksgiving Day in addition to his regular hours for the month.

93) _____

Answer: Rate per day = $\frac{1345}{3}$ = \$269/day

Rate per hour =
$$\frac{1345}{35}$$
 = \$38.43/hr

Total working days in October 2013 = 22 days

Pay for regular days = $269 \times 22 = 5918

Pay for overtime = $5 \times 2 \times 38.43 = 384.29

Gross earnings for October 2013 = \$5918 + \$384.29 = \$6302.29

Explanation:

Topic: 1.5 Applications - Payroll

94) Isabelle works for The Brick, a furniture company. She earns a base salary \$12/hr, 40 hours a week. However, she is also paid commission of 2% for all sales and an extra lump sum of \$1000 incentive if her monthly sales exceed \$10 000. In the month August, she won the title of employee of the month for total sales of \$75 000. How much did she earn in the month of August, assuming a 4 week month?

4)

Answer: Base salary = $12 \times 40 \times 4 = 1920

Commission earned in August = 2% × 75000 = \$1500

Total pay for August = \$1920 + \$1500 + \$1000 = \$4420

Explanation: ID: cbm12h 1-94

Topic: 1.5 Applications - Payroll

95) Isabelle works for The Brick, a furniture company. She earns a base salary \$12/hr, 40 hours a week. However, she is also paid commission of 2% for all sales and \$1000 incentive pay for every sale of \$10 000. In the month August, she won the title of employee of the month for total sales of \$75 000. How much did she earn in the month of August, assuming a 4 weeks month?

95) ____

Answer: Base salary = $12 \times 40 \times 4 = 1920

Commission earned in August = $2\% \times 75000 = 1500

Total incentive pay = $7 \times $1000 = 7000

Total pay for August = \$1920 + \$1500 + \$7000 = \$10420

Explanation: ID: cbm12h 1-95

MULTIPLE CHOICE. Choose the one alternative that best completes the statement or answers the question.

SHORT ANSWER. Write the word or phrase that best completes each statement or answers the question.

99)

100)

99) On March 1, Sam invested \$90 000 in a business. On June 1, he invested another \$10 000. On July 1, he withdrew \$17 000 to spend on the repair of his house. On September 1, he injected another \$2000 into the business. What was his average investment per month in the business during the year? Assume all months have the same length or weighting.

Answer: \$0 are invested for 2 months \$90,000 are invested for 3 months \$90000 + \$10000 = \$100,000 are invested for 1 month \$100,000 - \$17000 = \$83000 are invested for 2 months \$83000 + \$2000 = \$85000 are invested for 4 months

Average investment = $\frac{0 \times 2 + 9000 \times 3 + 100000 \times 1 + 83000 \times 2 + 85000 \times 4}{12}$ $= \frac{876000}{12} = $73\,000 \text{ per month}$

SHORT ANSWER. Write the word or phrase that best completes each statement or answers the question.

101) In 2011, Danny invested his savings among four mutual funds as follows: 25% in bonds fund, 20% in Canadian equity fund, 40% in US equity fund, and the rest in money markets. During the past year, the rates of return on the individual funds were 7%, 3%, 9%, and -1%, respectively. What was the overall return rate on his portfolio?

101)

Answer: Contributing rate of return from bonds fund = $25\% \times 7\% = 1.75\%$

Contributing rate of return from Canadian equity fund = $20\% \times 3\% = 0.6\%$

Contributing rate of return from US equity fund = $40\% \times 9\% = 3.6\%$

Contributing rate of return from money market = (100% - 25% - 20% - 40%) ×

(-1%)

 $= 15\% \times (-1\%) = -0.15\%$

Overall return rate on portfolio = 1.75% + 0.6% + 3.6% - 0.5% = 5.8%

Topic: 1.3 Percent

131) A house in Detroit was sold at \$246,000, which is $\frac{4}{13}$ of its actual value. If the realtor

131)

made a commission of \$1.25 on each \$250 of the actual house value, how much commission does the realtor earn while selling the house?

Answer: $\frac{1}{13}$ of the house's actual cost is $\frac{4}{13}$ of the cost ÷ 4.

$$$246\ 000 \div 4 = $61\ 500.$$

 $\frac{13}{13}$ of the cost or all the actual value of the house, is $\frac{1}{13}$ of the cost × 13.

$$\frac{13}{13}$$
 of the house's price is \$799 500.

The realtor earned \$3997.50.

Topic: 1.4 Applications - Averages

134) Oliver received a pay at the end of the month of \$4 303.00 in June 2016, working 6 hours a day, and a total of 20 days in the month. Included in the pay is a bonus of \$243. What is Oliver's hourly rate of pay? Round to the nearest cent.

134)

Answer: \$4 303.00 - \$243 = \$4 100.00

 $$4\ 060 \div 20 = 203 $$203 \div 6 = 33.83

Oliver's hourly rate of pay is \$33.83

Explanation: ID: cbm12h 1-134

Topic: 1.5 Applications - Payroll

135) An employee at a nuclear power plant in New York has an annual salary of \$143 000 and i every two weeks. The employee works twenty days in a month, five days in a week, and e hours in a day. (Assume 52 weeks in a year)

135)

- a) What is the gross pay per pay period?
- b) What is the employee's hourly rate of pay?

Answer: a) $52 \div 2 = 26$

He has 26 pay periods in a year.

\$143 000 ÷ 26 = \$5500

The employee's gross pay per pay period is \$5500

b) $$5500 \div 10 = 550

 $$550 \div 8 = 68.75

The employee earns \$68.75 per hour.

Topic: 1.4 Applications - Averages

145) Pooja has an annual salary of \$98 351.00 and is paid biweekly. Her regular workweek is 32 145) hours.

- a) What is Pooja's gross pay per pay period?
- b) What is the hourly rate of pay?
- c) What are the gross overtime earnings for Pooja if the overtime rate is one and three quarters the regular hourly rate of pay and she works 8 extra hours?

Answer: a) Yearly salary = \$98 351.00

Biweekly gross pay = 98 351/26 = \$3782.73

b) Biweekly gross pay = \$3782.73

Weekly gross pay = 3782.73/2 = \$1891.37 Hourly rate = 1891.37/32 = \$59.11

c) Hourly rate = \$59.11

Gross overtime earnings = 59.11(1.75)(8) = \$827.54

131) $\frac{1}{13}$ of the house's actual cost is $\frac{4}{13}$ of the cost ÷ 4.

 $$246\ 000 \div 4 = $61\ 500.$

 $\frac{13}{13}$ of the cost or all the actual value of the house, is $\frac{1}{13}$ of the cost × 13.

\$61 500 × 13 = \$799 500

 $\frac{13}{13}$ of the house's price is \$799 500.

 $$799\ 500 \div $250 = $3198.$

\$3198 × \$1.25 = \$3997.50

The realtor earned \$3997.50.
